

odd/even

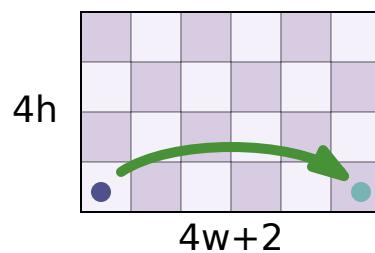

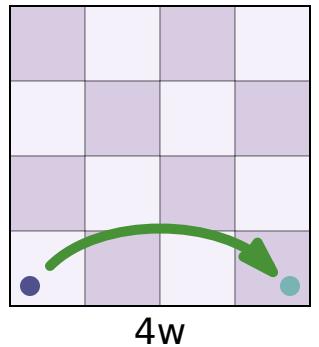

The diagram shows a square grid divided into a 2w+1 by 2w+1 arrangement of smaller squares. The colors of the squares alternate between light purple and white. A green arrow starts at a dark blue dot located at the second column from the left and the second row from the bottom. It points diagonally upwards and to the right, ending at a teal dot at the 2w+1 column and the 2w+1 row. There are other dots and arrows: a light blue dot at the 2w+1 column and the 2 row; a dark blue dot at the 2w+1 column and the 2w+1 row; and a teal dot at the 2w+1 column and the 2w+1 row. Green arrows also point from the light blue dot to the dark blue dot at the bottom-right, and from the dark blue dot at the bottom-right to the teal dot at the bottom-right.
